APPLE INNOVATES PROGRAM

The Club organized a field trip to the Brea Apple as part of our digital design program. 14 Club members had the opportunity to learn how to design their own Apple emoji's. They worked in a large group setting with two Apple geniuses to make their designs come to life. The members were instructed on the basics of stroke lines, smudge lines, and exposure settings. This was a great experience for these members!

TORCH CLUB

February was a very busy month for Torch Club. Members spent the first half of February selling Val-O-Grams. They accomplished their goal of selling all the Val-O-Grams and raised a total of \$66. Torch club members also hosted their first bake sale of the year. In hopes of adding a new spin on their classic bake sale, they organized a mobile bake sale cart. They traveled throughout the club selling homemade Valentine's Day treats. In total, they raised \$63 dollars.

APPLE INNOVATES PROGRAM EXPANSION

This school year, we have expanded the Apple Innovates program to our WMS ASES site. This program has allowed our members to develop digital design skills to enhance their digital fabrication projects. During the Open House at Washington Middle School, our 3D printing program took center stage, leaving students, parents, and supporters inspired by the remarkable work of our ASES students. Students showcased their incredible custom 3D printed pieces and highlighted the partnership with Spyder Lab. The enthusiasm and talent displayed by our students resonated with visitors as we shared insights into our certification program and badges.
